Links2Wellbeing
social prescribing for older adults

Links2Wellbeing: Guide to Getting Started

The tools and resources contained in this package have been created for use by participating centres. **This package** includes all the forms and information that will help you be successful in the project. The information collected will contribute to the achievement of the previously referenced objectives.

**Please note that all forms and resources included in this package will also be sent as individual digital documents to participating centres.*

Steps to Setting up Links2Wellbeing at your centre.

- Select a Designated Centre Contact to implement the major aspects of Links2Wellbeing at your centre (see Appendix A)
    - Review the opportunities for support and education through the OACAO and more (see page 7).
- Review the Tools and Resources in full to understand forms and process
    - Customize your referral form
    - Have customized prescription pads printed through the OACAO
    - Familiarize yourself with accessing the L2W google drive
- Confidentiality and privacy

  Participating centres will want to ensure the confidentiality and privacy of clients' personal information. The following suggestions may help you in this regard:
    - Provide an independent email for the sole purpose of the social prescribing project with only a couple of designated people having password-protected access to the information.
    - Ensure that your fax machine (if available) is monitored by a trained Designated Centre Contact (DCC) and/or Volunteer Link Ambassador (VLA)
    - Ensure that all social prescriptions/Rx are kept in a secure, locked filing cabinet.
    - VLAs to sign a pledge and confidentiality agreement.
- Advertise for and train Volunteers (see Appendix A)
- Begin building a network of health care partners (see page 7 for tips and more information)
    - Note: your network can start small. 1-2 strong health care connections are often all you need to get started.
    - You can develop a process to reach out to additional providers as you begin to expand and/or make more community connections.
    - Volunteers are a great support in this area.
- Receive your first referral, or subsequent referrals
    - Follow the steps outlined in Section D (page 9)

*****NOTE:** all page, section and appendix references are related to the full Tools and Resource document found in the Links2Wellbeing Google Drive. On its own this page is meant to act as a general overview for getting started.*
